Our Mission

El Cerrito Trail Trekkers is a nonprofit group dedicated to preserving, improving and extending the city's network of public pathways, stairs, trails and greenways for pedestrian and bicycle use. We also advocate for increased public open space, and sponsor activities that involve trails and open space, including hikes, festivals, and other educational events.

Some background on Trail Trekkers.

El Cerrito Trail Trekkers was founded in 2010, initially as an offshoot of the city's Environmental Quality Committee but it shortly became an independent nonprofit group under the fiscal sponsorship of the El Cerrito Community Foundation.

Inspired by the example of Berkeley Path Wanderers, an older and larger organization, we focused on bringing more attention to the trails in El Cerrito and to the city's Hillside Natural Area.

Our accomplishments since then have included:

Building several new trails from scratch, including the Motorcycle Hill and two Snowden Trails, thereby opening up for public what had been an impassable section of the Hillside. We also built several new trails in the Madera Open Space section of the Hillside Natural Area.

We successfully advocated for the city to acquire the once privately owned Madera Open Space and to add it to the Hillside Natural Area. We worked closely with Trust for Public Land and the El Cerrito High School Mountain Bike Club on this project, and raised \$100,000 towards the land's purchase.

As a result of that campaign, we also ensured that all of the Hillside Natural Area will remain open space in perpetuity, thanks to a deed restriction on the land that was part of federal funding that helped buy Madera Open Space.

Working with the National Park Service, we created the first ever map to all of the city's trails and created the first citywide trail signage plan. Working with the El Cerrito Rotary Club we created the Rotary Interpretive Trail in the Hillside Natural Area.
